EDUCATION

University of Georgia

Bachelor of Science, Computer Science

Dec 2026

GPA: 3.64

TECHNICAL SKILLS

Languages: HTML5, CSS, JavaScript, TypeScript, Java, Python, C

Tools & Frameworks: ReactJS, NodeJS, NextJS, ThreeJS, Supabase, MongoDB, Postman, Git, GitHub, Figma, Resend

PROJECTS

KnockLock– Hackathon Prize Winner

NextJS | Tailwind | TypeScript

- Winner of “Best .tech Domain” at UGA Hacks 11
- Built a companion web application for configuring a smart door lock that authenticates users via personalized knock patterns
- Developed front-end interface enabling users to record, store, and manage custom knock sequences paired with ESP32 hardware
- Integrated real-time communication between the web client and embedded IoT firmware to deliver seamless lock/unlock feedback

Podcast Website w/ Merch Store & Checkout

NextJS | Tailwind | TypeScript

- Built and deployed youngmindspodcast.com using NextJS, React, and TypeScript, emphasizing performance, accessibility, and user experience.
- Implemented a custom merch store and checkout flow, supporting product variants, image carousels, and real-time order total calculations.
- Integrated QR-based Cash App payments, automated order and contact emails with Resend
- Designed responsive layouts and animations using Tailwind CSS and Framer Motion for a polished, production-ready UI.

Botannica - Trail Finder

NextJS | TypeScript | REST API | MongoDB

- Team leader for a website that finds trails and parks in Athens using the Open Athens API.
- Implemented user authentication, included scheduling group outings and leaving park reviews, which were all stored using MongoDB through REST APIs.
- Prototyped w/ Figma, React for frontend, NodeJS and TypeScript for backend, regular CSS for styling

3D Research Lab Website Front Page

ThreeJS | NextJS | React

- Built an interactive 3D website for UGA's SSRL using ThreeJS, featuring a scroll-driven camera animation that takes you through a solar system of planets
- Engineered a responsive, layered UI with snapping scroll sections, and translucent content cards composited over a full-viewport 3D canvas using z-index stacking, CSS grid, and a mobile-adaptive hamburger menu
- Optimized real-time rendering performance by managing Three.js resource lifecycles (renderer disposal, animation frame cleanup, event listener teardown) within React's useEffect hook

WORK EXPERIENCE

UGA Small Satellite Research Laboratory

Feb 2026 – Present

Frontend Web Developer

Athens, GA

- Designing, developing, and improving the SSRL website for better public consumption

Construction Partners Inc.

May 2025 – Aug 2025

Information Technology Intern

Valdosta, GA

- Resolved 250+ IT support tickets, took many calls, and troubleshooted issues related to user accounts, software installations, and network access for CPI's 5,000+ employees
- Increased the department's helpdesk efficiency by 14%
- Utilized Microsoft Azure for cloud license management and enterprise IT infrastructure

LEADERSHIP

Boy Scouts of America – Eagle Scout
